WE THINK NEW PRODUCTS

Whether new construction or renovation, LEIPFINGER-BADER offers integrated system solutions for the sustainable present and future of construction:

PREFACE

THOMAS BADER, OWNER AND MANAGING DIRECTOR OF LEIPFINGER-BADER GMBH

As part of the LEIPFINGER-BADER Group, we are among the leading manufacturers of building materials and system components for climate-neutral construction. We see ourselves as innovation drivers with a clear focus on ecologically sustainable products and a reliable partner to our customers. Our strong local ties are also reflected in our love on natural raw materials. We have been processing naturally occurring clay for decades. At our location in Weroth (Westerwald), we

extract Europe's finest clays and process them into a high-end building material using our state-of-the-art production facilities. We are convinced that we must reduce material consumption for environmentally friendly buildings with a healthy indoor climate. Therefore, we attach particular importance to continuous circular economy in everything we do, making us one of the trendsetters in the industry.

Please inquire in the specific case so that we can check the feasibility in relation to your format request.
We will be happy to advise you here.

STRONG CERAMIC ELEMENTS IN A STRONG LOOK

INSPIRED BY NATURE

Our proof that a ceramic element doesn't have to look like a ceramic element: the TONALITY Design Collection brings the „wow!“ factor to facade construction – and impresses with modern designs in fascinating colours. Protected throughout by surfaces hardened using the MCS process. Inspired by nature.

Discover the Design lines Oak, Travertine, Cement and Porphyry in exciting colours. UV-resistant, extremely robust, impervious to graffiti and in the usual high TONALITY quality.

GRAFFITI USING A
SIMPLE CLEANER!

RESISTANCE IN ALL RESPECTS

Its qualities make the TONALITY facade element something of a superhero: impact- and scratch-proof, UV- and frost-resistant, impervious to graffiti, the weather and thermal influences. In short, our products take on any challenge – and lose neither shape nor colour. For us, that's just good form.

FOUR COLOURS ONE BRILLIANT SIZE

COLOURS

The ceramic slats are available in four modern design colours and with a plain surface: dark grey, medium grey, light grey and white matt. The colours can also be combined.

70025
black matt

70005
dark grey

70014
medium grey

70015
white matt

SIZE

Their format and low weight make the slats a perfect choice for use in both solid and wood frame construction. They always stand out with lifelong weather protection, zero maintenance and the combination of design and ecology.

INTRODUCING OUR NEW PRODUCT

THE FACADE FOR CARPENTERS, FACADE BUILDERS AND EXPERIENCED DO-IT-YOURSELFERS

EASY INSTALLATION

The ceramic slats and the aluminium system rail are optimally matched to each other. The slats are secured by a broad locking pin in the profile. The default pre-bent angle can be bent into the desired final position using customary needle-nose pliers. Integrated pressure springs ensure a tension-free, but secure fit of the slats.

AVAILABILITY

The slats come in four modern colours with a matched substructure and are readily available from specialist retailers as in-stock products. They are suitable for use in both private residential construction and larger surfaces in rental, municipal and commercial buildings.
